## Optimin® Zinc 15% E.U.

### Item Code

---

17113310

### General

---

Optimin Zinc 15% is the product resulting from the chelation of a soluble inorganic zinc salt with amino acids and short peptides originated from hydrolyzed soy protein.

In the European Union Optimin Zinc 15% is registered as a nutritional feed additive according to Regulation (EC) No 1334/2003 / Corrigendum and amendments belonging to the functional group of compounds of trace elements. When used as a commercial feed ingredient it must be declared as: E6 Zinc, Zinc chelate of amino acids hydrate .

### Applications

---

Optimin Zinc 15% is a nutritional feed additive for livestock, fish and companion animal diets. Optimin Zinc 15% is designed to effectively prevent nutritional disorders related to zinc supply.

### Specifications

---

- Total Zinc min. 15% (guaranteed analysis)
- Moisture max. 8% (in original unopened bag)
- Appearance free flowing powder
- Colour off white
- Odour a mild grain derivative odour

### Recommended dosage for use

---

Optimin Zinc 15% should be fed at a supplementation rate between 25 and 50% of the daily requirement, depending on the basal zinc supply of the feed and on the degree of dietary or physiological challenges to the zinc status.

### Packaging

---

25 kg/55.1 lb multi-wall paper bag with LDPE inner liner.

## Stability & Shelflife

---

Store in a cool, dry place in original packaging and protect from humidity.

Keep product container tightly sealed when not in use.

This product is stable in pelleting and extrusion processes.

This product is stable in the original unopened bag for 2 years from the manufacturing date.

Batch number and Manufacturing date: see bag label

## Undesired substances

---

All levels of possible undesired substances comply with Directive No. 2002/32/EC and amendments of the European Parliament and of the Council on undesired substances in animal feed

## GMO

---

In compliance with European feed legislation related to traceability and labeling of genetically modified organisms and the traceability of food and feed products produced from genetically modified organisms (Regulation (EC) No 1830/2003 and amendments).
